BRITISH CHEMICAL ENGINEERING

INDEX TO VOLUME 8—JANUARY—DECEMBER, 1963

SUBJECT

A

Absorber. Agitated * and novel sieve tray D.298
Venturi * proven D.376

Absorption. How to allow for gas and liquor rate variation in * ... D.295
Another prospective design tool D.295
Taking account of viscosity in * ... D.454
Selective gas * for multicomponent systems, by W. H. Granville ... 629

Acetylene. New * process challenges ethylene D.226

Adsorption. Fluid bed * of CS_2, by H. M. Rowson 180
Activated carbons for liquid-phase *, by H. J. Fornwalt, W. A. Helbig and G. H. Scheffler 546
Sheet material for * D.798
Selection charts for standard * equipment, by J. W. Carter ... 836

Air pollution problems of iron and steel industry C.45
Vibration motor helps in clean * problem P.571
Chimney design still an outstanding * pollution problem C.770

Alumina. Recovering * from clays D.532

Ammonia. Specific volume of liquid *, by A. M. P. Tans ... N.132
Calculation problems of * synthesis converters, by J. J. Hay and I. M. Pallai 171

Analysis. Analytical techniques for r rocessing D.380
Particle size * in industry ... F.400
Process * developments ... D.150

Aniline steam stripping, by S. J. Michell and C. Cheesbrough ... 251

Anodic protection has possibilities D.530

Arc promises new route to inorganics D.226

B

Boiling. A survey of * burnout, by W. R. Gambill 93
Fresh light on * D.738

Borough Polytechnic chemical engineering laboratory F.184

C

Calcination of radioactive wastes, Anon. 701

Carbon. Activated * for liquid-phase adsorption, by H. J. Fornwalt, W. A. Helbig and G. H. Scheffler ... 546

Carbon Dioxide. Solid * saves three-day shutdown P.278

October	... ...	,, 667-734
November	... ...	,, 735-796
December	...	,, 797-858

Carbon Disulphide. Fluid bed adsorption of *, by H. M. Rowson ... 180
Carbon tetrachloride and chloroform from *, by F. Molyneux ... 696

Carbonization. Advantages of fluid bed * D.147

Carbon Tetrachloride and chloroform from carbon disulphide, by F. Molyneux 696

Catalysts. How best to regenerate * D.373
Techniques for reactivation and recovery of * D.373
Reducing metal poisoning of cracking * D.373
Radiation, cryogenics, catalysis in new processes D.378
New * herald better processes ... D.602

Caustic. Plant for the continuous concentration of * alkaline solutions F.471
* soda without electrolysis ... D.672

Centrifugal Pump. Bearing life in * P.204

Chemical Engineers head Ph.D. engineering emigrants F.244
Mathematics and * L.677

Chlorine. Improvements in * manufacture D.300

Chlorination. Practical aspects in the * of ilmenite, by A. W. Nordin... 257

Chloroform and carbon tetrachloride from carbon disulphide, by F. Molyneux 696

Chromium plating tackles awkward problem D.798

Classifier. Spiral * quenches ore ... P.279

Cleaning rig for tube bundles ... P.435

Coal. A.C.S. symposia show * still has many uses C.417

Communication. Inter-* system for chemical plants P.59

Condensers. Inhibitor recycle system protects * D.302
Finned tubes in * D.452

Conferences
Process Optimization, 3rd Congress of European Federation of Chemical Engineering, London, June 1962 ... 43
Clean Air Conference, Harrogate, Oct. 1962 45
Clean Air Conference, Scarborough, Oct. 1963 770
Joint Automatic Control Conference, New York University, June 1962 ... 115
Symposium on Utilization of Resources in Relation to Chemical Plant Management, Manchester, Dec. 1962 ... ... 119 and 190
Symposium on Mixing and Stirring, Manchester, Nov. 1962 186
Symposium on Fresh Water from the Sea, Athens, June 1962 (Part II) ... 187
Symposium on Civil and Structural Considerations in Chemical Plant Design, Manchester, Jan. 1963 ... 263
International Refrigeration Convention, London, 1962 265
Annual meeting of German chemical engineers, Mainz, Oct. 1962 ... 332
12th Canadian Chemical Engineering Conference, Sarnia, Oct. 1962 ... 334
A.C.S. Symposia on Non-fuel Uses of Coal, and on Recovery, Purification and Utilization of Coal Chemicals, Cincinnati, Jan. 1963 417
Symposium on Waste Water Renovation, Cincinnati, Jan. 1963 ... 418
Symposium on Ion Exchange, Cambridge, May 1963 490
Symposium on Chemical Process Hazards with Special Reference to Plant Design, Manchester, April 1963 491
N.A.C.E. 19th Annual Conference and 2nd International Congress on Metallic Corrosion, New York, March 1963 566
6th International Mineral Processing Congress, Cannes, May 1963 ... 635
A.C.S. National Meeting, Los Angeles, April 1963 704
Symposium on the Less Common Means of Separation, Birmingham, April 1963 828

Construction. Chemical plant * in Europe; 1962 (Anon.) 32
Advances in vessels * D.80
Civil engineering problems of chemical plant * C.263

Contactor. A cascade liquid-liquid *, by S. R. M. Ellis and C. Alfonso ... 238
Co-current * with high vapour rates D.296

Control. Recent developments in process * D.8
On-line calculations by computer * systems C.46
* of multiple effect evaporators ... D.80
An economical system of computer * F.104
More practical approach needed in automatic * C.115
* by heat balance D.152
Don't neglect the panel D.226
Some tips for panel design ... D.226
Better * of batch distillation columns P.352
Latest automatic * for Indian fertilizer plant F.396

* Replaces the indexed word

KEY TO REFERENCE LETTERS PRECEDING PAGE NUMBERS:

C=Conference review D "Digest" item F=Short feature L=Leading article N=Nomogram P=Process Engineer's Notebook

Control (contd.)

Practical application of statistical methods in * D.458
Reflex divider solves distillation * problem P.511
IFAC Conference, 1963 ... ... L.745

Controllers. Chemical reaction-based * D.150

Convection. Free * from a horizontal cylinder in the presence of thermoacoustic streaming, by D. S. Davis N.644

Conversion. New method of gas * F.222

Converters. Calculation problems of ammonia synthesis *, by J. J. Hay and I. M. Pallai 171

Conveying. Favourable prospects for hydraulic * of solids D.148

Cooling hot gas with evaporating spray, by R. P. Fraser, N. Dombrowski and W. R. Johns 390
Pumpless circulation * system ... P.838

Corrosion. Research yields new data on metallic * C.566

Cost of rectangular and cylindrical tanks in various materials F.569
* of bubble-cap columns F.640
* of Dowtherm boiler installations F.712
* of coiled tubes F.712
* of cyclone separators F.712
* of mild steel chimneys F.712
* estimation in the chemical industry, by H. Stogens 825

Crystallization. Vacuum crystallizer has novel features D.378
Yield of * process N.436
Controlling factors in * and the use of ultrasound D.454

Cyclones separate gases from liquids ... ... D. 82
Liquid * in the chemical industry, by F. T. C. Doughty 616
Improving the performance of hydro* P.639
Dissolving solids with the hydro* P.706
Umbrella system of controlling hydro* P.707
Cost of * separators F.712

D

Dehydration. Economical*of caustic D.154

Dehydrogenation. Improved performance of * plant P.131

Design. Too little *? L.305
Where lies the risk? L.383
Spotlight on * L.609

Diffusion. Estimation of binary * coefficients for air-polar and air-nonpolar gas systems, by J. Roberts 753

Distillation. Graphical treatment of Underwood's Method (ternary mixtures), Part III, by K. L. Butcher 106
Mass transfer theory in *, by R. M. Thorogood 164

The testing of industrial * columns, by P. E. Barker 306
Dynamic and qualitative aspects of * theory, by R. M. Thorogood ... 328

Distillation (contd.)

Better control of batch * columns P.352
Reflux divider solves * control problem P.511

Drier. Spray * testhouse opened in U.K. ... ... F. 42
Rotary trommel fluidized */cooler F.563

Drying. Spray * tackles difficult waste problems ... ... D. 1
Calculation of batch * time, by G. Narsimhan N.280
* by silica gel and molecular sieves D.530
Paper * without stress D.532
Spray * with low humidity air ... D.532

Dust. Suppression of * in a fertilizer plant, by F. J. Harris and T. Craig ... 99
New survey pinpoints * explosion hazards ... ... D. 4
Pinch-cock for solids avoids * nuisance P.570

E

Electrodialysis as a unit operation, by G. S. Solt, E. Wegelin and C. V. G. Chapman 485

Engineers. Are * obsolete? ... D.380
The Engineer and Parliament ... L.537

Equilibria. Calculating phase * ... D.148
The determination of equilibrium data for the oxygen-nitrogen system at high oxygen concentrations, by R. M. Thorogood and G. G. Haselden 623
Calculation of vapour-liquid * in the system urea, ammonia, carbon dioxide and water, by S. Wicar ... 818

Ethyl bromide made by radiation D. 2

Ethylene. Baglan Bay plant adds to expanding capacity of U.K. * producers F.827

Evaporation. Optimum operation in *, by A. H. P. Skelland 242
Optimum effects for minimum costs in *, by A. H. P. Skelland ... 401
Determination of the heat of *, by H. Bokos and A. Jakabos ... N.840

Evaporators for difficult duties ... D. 78
Multiple-shaft * for pasty products ... ... D. 78
Control of multiple-effect * ... D. 80
Titanium * for uranium and plutonium liquors, by J. Lindley 397

Exhibitions. Leipzig Fair, 1963 412 and 495
1st International Exhibition of Chemistry in Italy, Milan, June 1963 758

Extraction. Novelties in * equipment D.296
Axial mixing in * D.454

F

Fastenings. Movable * for glass, Perspex or plyboard P.707

Fermenters. Power input to * and similar vessels, by J. W. Richards ... 158

Fertilizers. Production of diammonium phosphate * F.222
Developments in * manufacture... D.735
* process selection D.735

Filters. Mist collector ... ... D. 4
Dust collector ... ... D. 4
Automatic cake removal by new * D.802
Candle * aids automation ... D.802

Flat. Vortex Hydrosifter, ... Potentialities of the, by W. A. Beverloo, H. A. Leniger and J. A. G. Weldring 678

Flotation. New particle separation process D.378
Destroying * foam P.638

Flowmeter. Simple * modification P.510

Fluid bed adsorption of CS_2, by H. M. Rowson 180
New opportunities for * ... D.224
* for quenching D.300
Product sampler for * reactor ... P.353
Distributors for * D.670
What happens in a * D.670
* heat recovery enhances process economics D.672
* processing expands D.800
Mixing in *... ... ... D.800

Fluidization. Progress in * (a review), by J. S. M. Botterill ... 21
Wide interest in * practice ... D.147
Advances in * research D.147
D.376

Studies on the gaseous * of solids, Part I. Wall effects on * characteristics, by G. N. Bhat, K. Guconic-Murthy and E. W. Weingaertner ... 813

Foam control by acoustic and aerodynamics means, by R. M. Boucher and A. L. Weiner 808

Friction losses. The effect of the Froude number in estimating vertical two-phase, gas liquid *, by W. J. Davis 462

Friction Welding shows promise for joining dissimilar metals ... D.668

Frosting effects explained D.738

Furnace. Rotary * cooling system overcomes awkward expansion problem P.278

G

Gas cleaning by the foam method (translation from Russian article) ... 319
* making revolution D.600
Determination of the optimum pressure for operating catalytic * reactors, by B. A. Hills 683
New processes herald changing pattern of * making in U.K. ... F.817

Gasification. Nuclear heat for * ... D.674

Gauge. Cheap liquid-level * ... P. 59

Granulation. Granules oust pigs (iron * plant) ... ... D. 6
Dish * in the chemical industry, by J. D. Corney 405
Pan * of high-nitrogen fertilizers... F.700

Graphite. The X-flow Polybloc system of construction for *, by A. Hilliard 234

Grinding. Some recent advances in * theory and practice, by F. C. Bond 631

H

Handling. Economical bulk * of phosphate rock F.545

Hazards. Predicting * in liquid hydrocarbon transference D.224

Heaters. Simple gas-fired air * ... P.279

Heat Exchangers. Graphical determination of thermal stresses in fixed tube-plate *, by J. Starczewski 177
Baffle proportions and leakage in shell and tube * D.451
Leak detection in * P.638
New light on tubular, plate and finned * D.736
Recirculation improves shell-side performance D.738
Rating baffled shell and tube * ... D.668
Counter-current gas-solids * ... D.804

Heat Transfer. Improving * and mass transfer rates ... ... D. 1
Monoisopropyldiphenyl as * fluid F.176
* for water boiling in pools, by D. S. Davis N.202
Improving * rates D.223
Another improvement in * ... D.223
Roughness, tapes, transpiration and coils in * D.451
Fresh light on * to solid particles D.452
* in catalytic reactor gauzes ... D.452
* from a sphere, by D. S. Davis ... N.512
* of refrigerants D.527
Improving * and mass transfer rates D.667
* near critical state D.668
Scratches and fine wires aid * ... D.736
* in trickle coolers D.736
Effects of * and mass transfer in rectification, by H. Brusset, J. Peuscet and J. G. Levain 746
Porous heat source possibilities ... D.804

Helium. Glass atomic sieve for * ... D.148

High-speed drive for vacuum equipment P.706

High-temperature. An evaluation of * chemical technology, by W. M. Goldberger 610
Specification and cost estimation of * indirect heating systems, by D. J. I. Davies 751

Hopper. Fresh light on * design ... D.148
Vehicle tipping action operates * valve P.706

Hydrogenation. Catalytic * glucose to sorbitol using a highly active catalyst, by M. A. Phillips 767

I

Ilmenite. Practical aspects in the chlorination of *, by A. W. Nordin... 257

Impeller. Estimate the performance of your * D.527

Information. Simpler * transmission D.226

Interfacial Phenomena. Mass transfer and *, by R. S. Schechter and R. W. Farley 37

Ion Exchange. New techniques for * and pelleting ... ... D. 1
* as a continuous or semi-continuous process C.490

L

Laboratories. New * advance knowledge in ceramics and carbon... F.628

Leipzig Fair. Part 1 412
Part 2 495

M

Malt distillery effluent plant, by R. K. Martin 763

Management. Rational planning of chemical plant operations Part 1 ... C.119
Part 2 ... C.190

Mass Transfer. Improving heat transfer and * rates ... ... D. 1
* and interfacial phenomena, by R. S. Schechter and R. W. Farley ... 37
* advances ... ... D. 75
*, the resistance concept in counter-current flow, by N. J. Hassett 86
* theory in distillation, by R. M. Thorogood 140
Calculating overall * coefficients... D.295
New approaches to combined heat and * problems D.296
A new correlation for * from single spheres, by G. E. Kinard, F. S. Manning and W. P. Manning ... 326
More help in * design D.374
* and plate efficiency in bubble-cap columns, by S. Bakowski, Part 1 ... 384
Part 2 ... 472
Possibilities for greater * rates ... D.456
The effect of concentration on interphase *, by R. K. Gibbs, I. Lazarraga and D. M. Himmelblau ... 538
Improving heat and * rates ... D.667
Effects of heat and * in rectification, by H. Brusset, J. Peuscet and J. G. Levain 746
* in leaching by liquid jets ... D.797

Materials. New metallic * abundant ... ... D. 76

Metal. framing system for storing barrels F.703

Metering. An answer to mass flow * D.152

Methylamines by new process in Belgium F.185

Mineral Processing. Full-scale experiment in * ... ... F. 31
Advances in * C.635

Mixing. Review of Symposium on Mixing and Stirring, Manchester, Nov. 1962 186
Dispersing immiscible liquids ... D.374
Estimating axial * in packed columns D.374
Axial * in extraction D.454
Disperse phase * and chemical reaction D.527
Mixers for free-flowing solids (translation from Russian article) ... 626
* in a fluid bed D.800
* under high shear conditions ... D.800
* rates in stirred vessels D.802

Models in science and engineering L.461

Molecular Sieves. Drying by silica gel and * D.530
* for hydrocarbon separators ... D.602

Monoisopropyldiphenyl as heat transfer fluid F.176

N

Nitric Acid. Processes for the manufacture of *, by G. Drake ... 12
Prediction of the degree of nitric oxide oxidation in * plants, by C. H. Solomon and A. W. Hodges ... 551
Bibliography of * manufacture, by Mrs. K. Bourton. Part 1 576
Part 2 724
Ponchon-Savarit method applied to the ternary system; *, sulphuric acid, water, by I. D. Doig 688

Nitrogen. New plant has flexible output of oxygen and * F.822

O

Obsolescence—A problem to face L.807

Optimization. More on * ... D. 2
Review of Process * ... ... C. 43
* techniques and applications ... D.298
New ways of finding the optimum D.458
Getting the best of a plant ... D.600
Determination of the optimum pressure for operating catalytic gas reactors, by B. A. Hills 683
* in practice D.797

Orifices. Flow of granular solids through *, by J. F. Kuong N.572

Oxidation. Anodic * of chlorine for pure perchlorates D.300

Oxygen. New plant has flexible output of * and nitrogen F.822

P

Packed Beds. Transport phenomena in * and RDC C.268

Panel. D.226
Some tips for * design D.226

Paper. Problems in * making ... D. 8

Particle. Panels in * technology ... D.154

Pelleting. New techniques for ion exchange and * ... ... D. 1

Pipeline. The place of the gas * ... D.150
Materials for *s D.150
* colour comparator D.152
Solids by *, a growing technique... D.528
Problems of solids pipelining ... D.528
Capsules and slugs by * D.559
Riches from the sea-bed D.559
Compressed air pushes "pig" through * P.707

Pipework. Support of * ... ... P. 58

Plasma. High temperatures and *... D.226

Plastics. More chemical plant uses for * ... ... D. 6
New metal * combinations ... D.302
Bright future for * constructions D.740
* for linings too D.740

Plate. Fitting bubble-cap * in distillation columns P.205
Mass transfer and * efficiency in bubble-cap columns, by S. Bakowski, Part 1 384
Part 2 472
Pulsing system for sieve * columns P.571
* efficiency calculations simplified D.742

Pneumatic Conveying. Pitfalls in * D. 82
Improved system of * P.130

Polypropylene for process plant, by D. C. Hings 823

Ponchon-Savarit method applied to the ternary system; nitric acid, sulphuric acid, water, by I. D. Doig... 688

Power input to fermenters and similar vessels, by J. W. Richards ... 158
Production of synthesis gas and * in reciprocating internal combustion engines, by G. A. Karim 392

Pressure. Balancing * systems, by D. S. Davis ... ... N. 60
Plastic * coupling for glass pipe ... 130
Designing the * relief system ... D.454
* joint P.838

Pressure Drop. Hold-up and * measurements in the two-phase annualr flow of air-water mixtures, by G. F. Hewitt, I. King and P. C. Lovegrove 311
* for flowing 50% caustic soda solutions, by D. S. Davis N.774

Pressure Vessel. New type of * ... D. 8
Improved * flanges ... ... D. 80
Hinged closures for styrene stripping column P.777

Process simulator aids training of operators F.325
* control gets new life D.456
New * for halogens, acids and alkaline salts D.602
Refining—Scene of important advances D.606
SO_2 reduction in the Kachkaroff *, by O. Sandalinas and R. Loste ... 618
Major * advances in phosphoric acid, alumina and rubber D.668

Productivity means teamwork ... L.157
* and research L.233
Germany and Italy set pace in chemical * F.256

Pulsing system for sieve plate columns P.571

Pump. Glandless * P.131
Diaphragm * for liquid metals ... P.434
Ceramic shaft sleeve for slurry *... P.435
Some pumping problems overcome F.615

Pyrites. The roasting of low grade *, by V. Vanecek and J. Trojan ... 556

RDC. Fresh light on * ... ... D. 76
Transport phenomena in packed beds and * C.268

Reaction. Analysis of complex * systems ... ... D. 76
A genralized rate expression for non-catalytic gas-solid *, by G. Narsimhan 322
Termination of batch *, by J. W. Richards 560

Reactors. Best temperature and yields in * with diffusion D.454

Reactors (contd.)
New aid to the design of packed bed * D.667
Determination of the optimum pressure for operating catalytic gas *, by B. A. Hills 683

Reboilers. Refinery kettle *, by J. W. Palen and J. J. Taborek ... 170
Continuous removal of wax from * P.353
Recovery of processing fluids ... P. 59

Rectification. Effects of heat and mass transfer in *, by H. Brusset, J. Peuscet and J. G. Levain 746

Reforming. Potentialities of steam/naphtha * process F.404
* natural gas, by T. G. Somer ... 466

Refrigeration breaks new ground D.228
Chemical industry provides variety of tasks for * C.265
Heat transfer of refrigerant ... D.527

Repairs to glass-lined vessels ... P.510

Research. Problems of applied * ... L. 11
Productivity and * L.233
Grant for chemical engineering * at Bradford ... ... F. 63

Risk. Where lies the * (in design) ... L.383

S

Scaling overcome in sulphuric acid plant waste heat boiler P.838

Science or Design ... ... L. 85

Sea. Riches from the * bed ... D.599

Sealing compound for steam leaks P.777

Separation. Uncommon * techniques C.828
* of immiscible liquids P.839

Separators. Developments in particle * D.534
A new phenomenon to exploit ... D.534

Sieve Bend. The *—A money saver D.604

Size Reduction. New mill cuts size and power D.376
Another new mill D.376
Particle * 1961-62, by J. Nijman ... 408

SO_2 conversion in the Kachkaroff process, by O. Sandalinas and R. Loste 618

Sodium Sulphate. Recovering * from waste liquors D.223

Solvay centenary D.458

Stainless Steel. British prospects for * tube ... ... F. 92
New Birmingham works for * supplies F.250
* tubes resist corrosion in tar still P.434

Statistical distribution, by N. H. Langton 478

Stirrer for viscous materials ... P.279
Magnetic * for small-scale columns P.839

Stresses. Graphical determination of thermal * in fixed tube-plate heat exchangers by J. Starczewski, ... 177

Sulphuric Acid. Bulk storage facility for * 324
Maintaining output from * plants P.352
Ponchon-Savarit method applied to the ternary system: nitric acid, *, water, by I. D. Doig 688
Scaling overcome in * plant waste heat boiler P.838

Synthesis Gas. Production of * and power in reciprocating internal combustion engines by G. A. Karim 392
The blast furnace as * source ... D.735

T

Tankers. Trends in road and rail *... F.114

Termination of batch reactions, by J. W. Richards 560

Testing. Advances in non-destructive * D.530

Thermal conductivity of liquids, by J. F. Kuong N.356
* of aqueous inorganic acids by D. S. Davies. N.708

Thermometer seal... ... ... P.776

TiO_2. Changing fashions in * production D.797

Tray. Interest in simple contacting devices ... ... D. 75
What happens to sieve * holes? ... D.223
Some fresh light on * efficiency ... D.295
Agitated absorber and novel sieve * D.298

Turbo Expanders. Vital role of * in cryogenics D.674

U

Ultrasound. Controlling factors in crystallization and the use of * ... D.454
Single crystals an attractive field... D.670

V

Valve. Simple high-vacuum * ... P.130
Rotary G.L.C. sampling * ... P.571
Variable flow splitter * P.777

Vessels. Design of * for commercial service at extreme pressures, by J. L. Skinner, R. D. Daniels and C. M. Sliepcevich 245
Advances in * construction ... D. 80
New methods of * fabrication ... D.528

Vibrations. A commercial application of * D.604
Potentialities of * D.604

W

Waste. Spray drying tackles difficult * problems ... ... D. 1
Biological treatment of gas plant * at nickel refinery F.222
Fuel gases from agricultural * ... D.224
Recovering sodium sulphate from * liquors D.223
"Fingal's Cave" for fixation of radioactive * in glass F.555

Waste (contd.)

Liquid * testing service F.794
Calcination of radioactive *, Anon. 701
Metal racking solves atomic * storage problem 703

Water injection cools compressed gases ... ... P. 58
Many techniques compete for * desalination, Part 2 ... ... C.187
More techniques for * renovation 418
Pilot plant points way to better design of * treatment plant ... F.757

X

Xenon forms new compounds ... D. 6

Y

Yields. Statistical determination of plant *, by A. T. Clementson ... 564
